**the best defence**

- Access Control
- CCTV
- Door Entry
- Intruder Alarms
- Integrated Systems
- Gate Automation & Barriers
- Fire Systems
- Physical Security

The complete security systems solutions provider, delivering uncompromising performance and value unrivalled within the industry.....

## About Us

Established in 1983, West London Security ( WLS ) is one of the country's leading electronic security providers. Our objective is to constantly meet or exceed our client's expectations whilst being at the forefront of technological change within the security and fire industries.

WLS offer a comprehensive design and installation service for the supply of:

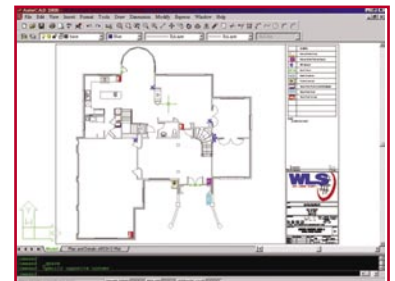

- Access Control
- CCTV
- Door Entry
- Intruder Alarm
- Fire Alarm
- Gate Automation
- Integrated Systems
- Satellite Television
- Physical Security

## Services

Our security and fire operations have a wealth of experience dedicated to satisfying even the most complex client needs. We offer a bespoke consultative service that starts with an analysis of what may be required, a detailed design including CAD facilities, followed by a fully project managed installation by our own engineers.

- Technical appraisal
- Design
- CAD facility
- Procurement
- Installation
- Project management
- Commissioning
- Maintenance
- Service

WLS recognises that as well as offering cost effectiveness within a competitive market-place, there is also a need to maintain the highest standards of customer service. All WLS employees are totally committed to quality and work to the highest standards in all areas. In recognition of this, WLS has successfully gained NSI (National Security Inspectorate) Gold rating for the installation of Access Control, CCTV and Intruder Alarm Systems. We are also ISO 9001 : 2000 approved.

## Access Control

Access Control systems provides the means to control, monitor and restrict the movement of people, assets or vehicles in, out and around buildings, premises, sites or vulnerable areas.

From small businesses to large multi-site corporations, WLS provides complete access control and security management systems utilising the latest swipe, proximity and biometric readers.

## CCTV

CCTV Systems enable constant remote surveillance of any commercial environment. With varying applications, increasing product ranges, types of systems available, and evolving technology, WLS can advise and customise a bespoke solution according to your requirements.

Systems can include joystick controlled high speed dome cameras, digital recording accessed remotely and number plate recognition cameras, which can be integrated with other security systems such as Access Control, Gate / Barrier Control and Intruder Alarms.

## Door Entry

Integrated audio or video door-entry systems enable you to monitor, control and verify access to any areas of private or industrial operation.

WLS can specify, test and install complete systems for offices, industrial premises and apartment blocks where secure control is required over one or many points of access with or without entrance-hall staff present.

## Intruder Detection

Intruder systems can be applied in most domestic, public and commercial environments, regardless of size. Intruder systems are primarily designed to detect an unauthorised presence in an area and raise an alarm.

WLS takes into account the day to day business use of the premises or the occupants lifestyle, so that the system remains first and fore most cost-effective, yet user-friendly, simple and trouble free in operation at all times.

## Gate Automation & Barriers

WLS has partnered with FAAC who have established a worldwide reputation as market leader in the field of automatic gate, door, barrier, pedestrian control and parking systems.

We can install and service a full range of operators including electromechanical rams, articulated arms, operators for sliding gates, underground systems and rising vehicle barriers.

## Fire Detection

Several system types and options are available, depending on the specific characteristics of the protected space.

WLS supplies and installs: heat and smoke detection systems, flame detectors, smoke beams, air-sampling and wire-free systems, automatic door and ventilation controls, and audio and visual warning systems, in addition to remote monitoring and fire brigade signalling systems, all in compliance with the recognised BS5839 standard.

## Physical Security

Our comprehensive product range for physical security solutions can be applied in most domestic, commercial and industrial applications.

Our experienced design and installation teams are committed to providing superior service and products, which are built for individual customer requirements.

- Railings and Gates
- Palisade Fencing
- Collapsible Gates
- Roller Shutters

## Satellite

Communal satellite TV systems (also known as an IF System) allows signals to be received at one rooftop dish and then distributed over a cabled backbone to various flats within the building. This provides tenants easy access to satellite television without the need for unsightly dishes fixed to the outside of the building.

WLS have been installing IF systems for over 12 years and can include London County Hall and Marble Arch Tower amongst our installations. Sources available include SKY, SKY Plus and Hotbird as well as the usual terrestrial services such as BBC1, BBC2, ITV etc.

## Service and Maintenance

Our company provides a comprehensive maintenance and servicing facility to systems we have installed as well as installations from other security companies. This offers total reassurance and peace of mind backed up by a 24hr emergency call out service from our trained and experienced service and maintenance engineers.

WLS can tailor a flexible contract to meet each customer's individual requirements for preventive maintenance, full service, emergency service, and response time.
